Shungite is a Miracle Mineral found in Karelia, Russia. It's been used many ways, for hundreds of years to promote healing, purify water & more.

Shungite has the unique ability to protect the bees from:
Environmental Radiation - EMF (electromagnetic frequencies) - Cellphone Radiation
Wi-fi Signals - Agricultural Chemicals/Toxins

*Scientists have found a special molecule exists within Shungite, the C60 molecule, also known as a Fullerene. This soccer ball shaped molecule is created within the vacuum of space & arrives in the form of an asteroid. Science can duplicate the C60 structure, but Shungite's natural form has proven instrumental to saving the bees!

**Scientists & Doctors** are using Shungite all over the world to: treat nuclear-radiation, clean drinking water, feed to livestock, healing rooms (made from Shungite tiles), protects electronic equipment and much more.

These energy disruptions cause a counter-clockwise spin, or an unhealthy energy field. Shungite's quantum energy field reverses this spin into a clockwise rotation, or healthy and biocompatible energy field.

Shungite
A Natural, Immediate & Economic Solution.

Medicinal Honey - "Healing Power of Honey"

Honey not only protects against damage caused by bacteria, but some honey can also stimulate production of special cells that repair tissue damaged by infection. Hydrogen peroxide is produced by honey, which is what gives it the antibiotic quality.

Honey also possesses antiseptic and antibacterial properties. Honey is an ancient remedy for the treatment of infected wounds, which has recently been ‘rediscovered’ by the medical profession, particularly where conventional modern therapeutic agents fail.

The beneficial properties of honey can be ascribed to the fact that it offers antibacterial activity, maintains a moist wound environment that promotes healing, and has a high viscosity which helps to provide a protective barrier to prevent infection. There are many reports of honey being very effective as dressing of wounds, burns, skin ulcers and inflammations; the antibacterial properties of honey speed up the growth of new tissue to heal the wound.

Honey’s Medicinal Uses:
- Treating diabetes
- Treating eye, ear & sinus infections
- Reducing high cholesterol
- Reducing systemic inflammation
- Treating gastrointestinal problems (acid reflux)
- Sore throats & cold relief
- Treating allergies
- Improve digestion & prebiotic support
- Helps cure UTI’s
- Improves circulation
- Antioxidant support
- Treat acne/eczema/psoriasis
- Lose weight
- Relieves respiratory & bronchial infections
- Heals wounds & burns
- & much more...

★ Internal Use: 3–6 drops daily with vitamins.
★ Topical Use: 1–2 drops directly on affected area.

- No chemicals of any kind are used on the bees - We have no sickness, losses or disease within the Shungite Beehives.

- No feeding - We leave the bees more than enough of their own honey so supplemental feeding/nutrients aren’t necessary. (Artificial feeding of sugars can harm bees, aluminum particles are often present in processed sugars)

- Only organic “smoker” materials are used in our beehive smokers - Dried Turkey Tail mushrooms or Reishi mushrooms are used for their natural antibiotic properties. (Artificial smoking materials can contain harmful chemicals)

- All processing equipment, product containers/jars and beehive materials are either 100% natural or 100% BPA-free.

- The Shungite Beehives are located more than 20 miles from commercial crops. (Thus avoiding cross contamination from pesticide/herbicide usage)
